

We thank our families who participated in our School Planning Engagement process with us this year through the online survey, participation in the School Council meeting and online meeting feedback. Although the number of responses was small, we value the insight from all parents who participated and offered input.

Parents indicated that they mostly stayed informed about our School Development Plan (SDP) through our school website, although some learned through school council and through SchoolMessenger. All parents who participated indicated that they felt their child(ren) could benefit from the goals, actions and resources identified in the SDP. All parents also felt that the learning of all students is reflected in the SDP.

Regarding budget and fees, parents identified fieldtrips (including transportation for the trips) and in-class enhancements (activities, equipment etc.) as their top two priorities. Other priorities were activities like clubs, performances, guest speakers and supplies.

All parents who completed the survey were satisfied that the activities provided by the school were important for their child's learning and that the fees paid were reasonable.

We thank all the parents for their participation in the meetings and surveys this year.
